Address: MehdiPatnam, Hyderabad, Telangana.

Summary

Highly motivated and dedicated 2024 graduate, Electronics and Communication Engineering at Muffakham Jah College of Engineering and Technology. Passionate about software development and seeking opportunities to excel as a Full Stack Developer. Eager to apply my technical skills and contribute to the growth of innovative software projects.

Skills

Web Development:

Frontend:

HTML, CSS, JavaScript, React.js

UI Frameworks: Bootstrap,
Tailwind CSS

Github

Backend:

- Node.js
- Express.js

Projects

Groceries List

(2024)

- Developed a web application to help users easily create, manage, and track grocery lists, streamlining shopping and reducing forgotten items.
- **Technologies Used:** Utilized MongoDB for data storage, Express.js and Node.js for the backend, React.js for the frontend.
- Delivered a responsive full-stack solution allowing users to add, edit, and delete items from grocery lists, with persistent data and a user-friendly interface for seamless shopping experiences.

Student Department

(2023)

- The Student Department Management Project Is to develop a web application that enables efficient management of student information within different departments of educational institution.
- Technologies Used:** Utilized MongoDB for data storage, Express.js and Node.js for the backend, React.js for the frontend.
- The system allows for the addition, modification, and retrieval of student records, as well as the assignment of student to specific departments.

Education

Graduation

(2020 – 2024)

Osmania University, Hyderabad

Bachelor of Technology in Electronics and Communication Engineering at Muffakham Jah College of Engineering and Technology, Banjara Hills, Hyderabad

Intermediate

(2018 – 2020)

Telangana Board of Intermediate Education
Narayana Junior College (MPC)

Certification

Full Stack Development Internship (MERN-STACK) (May-2023)

I had received my certificate in Full Stack Development Internship at Delta Sigma Technologies in Collaboration with Cephei Consultants, Australia. This was a major achievement for me, this was an 8 weeks internship in which I have worked under 4 major projects like: Groceries list, Writeups Platform, Workspace and a final project named student department in group of 3 members using MERN-Stack.
